

5 REASONS for RECALL of Ashland Parks and Recreation Commissioners (APRC)

1. Operating fund balance **deficiency of \$5,932,000 is projected by 2023**. This huge overrun will have to come out of the city's general fund, thus requiring major cuts in services to citizens in order to balance the budget.
2. **Laid-off the entire senior center staff** with no justification and no specific plan for the center's future. The staff had a combined total of **72 years of experience** helping seniors live independently in their homes through outreach and information/referral services. The **replacement staff had no qualifications** and experience in such services, thus **endangering our seniors' well-being**.
3. With disregard for public concern, APRC voted to **spend \$230,000 for a Portland consultant** to decide the fate and future design of **Lithia Park**, threatening specific historic sites in our beloved crown jewel.
4. APRC is planning a bond for a **\$3.5 million new competitive pool** to replace the existing Daniel Meyer pool. Director Black stated it would **'double what we are spending on our pool...'** No professional community needs assessment has been performed. Better way to go would be to create a multi-city and Jackson county buy-in to a Regional Aquatic Center. This way all cities and county taxpayers would share the costs; rather than Ashland alone.
5. APRC repeatedly and flagrantly **failed to follow Oregon Public Meetings Law** or the spirit of the law by under-publicizing meetings, failing to present minutes within three weeks of a meeting, and failing to accurately reflect citizen input in meeting minutes.

Ashland citizens reside in a democratic society and thus have reasonable expectations of their elected officials, foremost among them trust between citizens and elected officials. That trust has been broken regarding the Ashland Parks and Recreation Commissioners.

Recall now so that we can get three new commissioners who will:

- seek, listen and respect community input before making changes
- manage the budget much better to ensure Ashland's financial stability
- maintain well what we have before expanding or creating new programs
- restore the local senior social services' safety net
